No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                     2370.4

Pred. No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed,
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                           Score

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  double-stranded cDNA was size selected, ligated to Eco RI doublers (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of a modified pT7T3 vector the Not I and Eco RI sites of a modified pT7T3 vector old (Pharmacia). The retinas were obtained from a 55 year old Caucasian and total cellular poly(A)+ RNA was extracted 6 Caucasian and total cellular poly(A)+ RNA was kindly hrs after their removal. The retina RNA was kindly hrs after their removal. The retina RNA was kindly hrs after their removal. The retina RNA beat their removal. The retina RNA was kindly hrs after their removal. The retina RNA search the provided by Roderick R. McInnes M.D. Ph.D. from the University of Toronto. Library constructed by Bento Soares and M.Fatima Bonaldo. "

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          double-stranded cDNA was size selected, ligated to Eco RI adapters (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of a modified pTT3 vector the Not I and Eco RI sites of a modified pTT3 vector old (Pharmacia). The retinas were obtained from a 55 year old (Pharmacia) and total cellular poly(A)+ RNA was extracted 6 (Caucasian and total cellular poly(A)+ RNA was kindly hrs after their removal. The retina RNA was kindly hrs after their Toronto. Library constructed by Bento University of Toronto. Library constructed by Bento Soares and M.Fatima Bonaldo. "Soares and M.Fatima Bonaldo."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      /db_xref="taxon:9606"

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       double-stranded cDNA was size selected, ligated to Eco RI adapters (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of a modified pT7T3 vector (Pharmacia). The retinas were obtained from a 55 year old hrs after their removal. The retina RNA was extracted 6 provided by Roderick R. McInnes M.D. Ph.D. from the University of Toronto.     double-stranded cDNA was size selected, ligated to Eco RI adapters (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of a modified pT7T3 vector the PATTA control of the retinas were obtained from a 55 year old (Pharmacia). The retinas were obtained from a 55 year old caucasian and total cellular poly(A)+ RNA was extracted 6 caucasian and total cellular poly(A)+ RNA was kindly hrs after their removal. The retina RNA was kindly hrs after their removal. The retina RNA was with the provided by Roderick R. McInnes M.D. Ph.D. from the University of Toronto. Library constructed by Bento Soares and M.Fatima Bonaldo. "

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  (Pharmacia). The retinas were obtained from a 55 year old Caucasian and total cellular poly(A)+ RNA was extracted 6 hrs after their removal. The retina RNA was kindly hrs after their removal. The retina RNA was kindly provided by Roderick R. McInnes M.D. Ph.D. from the University of Toronto. Library constructed by Bento Soares and M.Fatima Bonaldo. "

During sequence assembly data is compared from overlapping clones. Where differences are found these are annotated as variations variation anotation may not be found in the sequence submission only a small overlap as described above.

This sequence was finished as follows unless otherwise noted: all regions were either double-stranded or sequenced with an alternate 30); an attempt was made to resolve all sequencing problems, such one plasmid subclone or more than one M13 subclone; and the assembly was confirmed by restriction digest. The following in the feature table with their source databases: Em:, EMBL; Sw;, Switssey, Smitssey, Switssey, Switssey, Emergine as the submission one submission one statement was made to resolve all sequencing problems, such one plasmid subclone or more than one M13 subclone; and the assembly was confirmed by restriction digest. The following in the feature table with their source databases: Em:, EMBL; Sw;, Switssey, Swit
This sequence is the entire insert of clone RP11-399019 The true left end of clone RP11-496H23 is at 166408 in this sequence. The true right end of clone RP11-304I5 is at 18704 in this sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              http://www.sanger.ac.uk/HGP/Chr10
RP11-399019 is from the library RPCI-11.2 constructed by the group of Pieter de Jong. For further details see
